Features

- Electronic timer and compensation circuit - Allows the welding of oxidised, zinc coated or paint resided sheet.
- High output - 5750 amps maximum welding current providing welding thickness versatility.
- Heavy duty transformer - Providing 2KVA @ 50% duty cycle.
- 2mm plate welding capability - At a rate of 60 spots per hour for 2+2 sheet mild steel.
- Superb welding speed - Will weld 1.2mm sheet mild steel (1.2+1.2) at a rate of 260 spots per hour.
- Excellent balance - Facilitating use and minimising user fatigue.
- Large arm clearance - Provides a 96 mm arm clearance facilitating welding access.
- Lasting quality - Design, construction and componentry promote reliability and longevity.
- Single phase operation - Operates from 20 amp (delayed action) fuse.
- 1 year warranty - For peace of mind.
- Arms included - Supplied with general purpose standard arms.
- Accessory option - A huge variety of additional arms and electrodes are available as optional extras.
- Fully adjustable tip pressure - For greater material and thickness versatility.

Specification

Field	Detail
Model Code	25088
Input Current	20A
Input Voltage 50hz	230V
Output @ 50% Kva	2
Continuous Input Kva	1.4
Max. Short Circuit Input Kva	16
Max. Welding Input Kva	12.5
Short Circuit Current Amps	7200
Secondary no load voltage	2.3
Welding current amps	5750
Max. Electrodes Stroke (mm)	65-200
Arms length	125
Arms gap (mm)	96
Electrod arm (mm)	20
Tip (mm)	10
Packed Dimensions (HxWxL) mm	170x460x350
Timing control	Elec
Weight (Kgs)	9.9

Carriage Free UK mainland.
