## Description

Modern efficient design rocker arm type spot welders suitable for a wide range of applications from those found in small workshops to high production in large factories.

## Features

- PBP pneumatic models are fitted with a solenoid valve and electric foot switch Fitted with PX1500plus digital control (S1 and PX1500Pplus also available)
- The water cooled brass arms are fitted with copper electrode holders
- The lower arm is adjustable for height
- A full range of electrodes is available The water cooled transformers are to an advanced compact design for maximum efficiency

## Specification

Field	Detail
Model Code	PBP116
Input Voltage 50hz	415V
Input Current	25A
Output @ 50% Kva	15
Short Circuit Current Amps	10.4 kA
Secondary no load voltage	3.03
Welding current amps	8.3 kA (max)
Electrodes Force Short Arms daN	PB - 180 / PBP - 250
Arms length	400(std) - (600 - 800)
Arms gap (mm)	220 - 350
Arms Diameter (mm)	45
Electrode holder dia (625 taper)	25
Electrode stroke (mm)	6 - 50
Water flow required (ltr/m)	5
Welding Capacity	2+2
Packed Dimensions (HxWxL) mm	1020 x 300 x 1270
Weight (Kgs)	120

**Carriage Free UK mainland.**
